# Department of Commerce and Consumer Affairs

## STATE OF HAWAII DEPARTMENT OF COMMERCE AND CONSUMER AFFAIRS ORGANIZATION CHART

# DEPARTMENT OF COMMERCE AND CONSUMER AFFAIRS Department Summary

#### Mission Statement

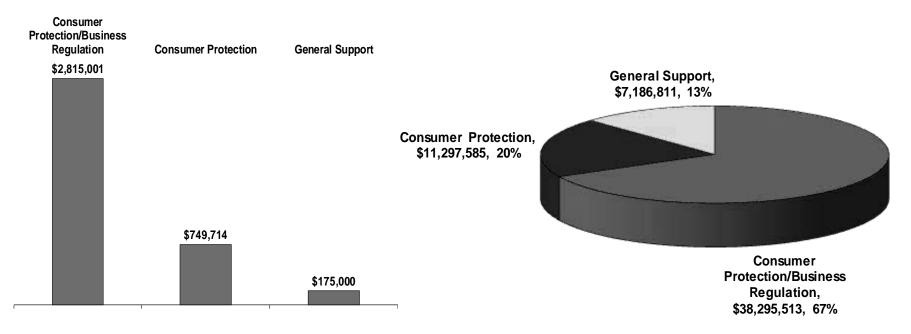

To fairly regulate business, while ensuring consumer protection in commercial transactions in Hawaii.

#### **Department Goals**

To develop, promote, and implement rational business regulation; to consider the public interest and increase the opportunity for public involvement in the regulatory process; and to ensure fairness in the conduct of administrative hearings that address decisions made by department regulators.

# FY 2015 Supplemental Operating Budget Adjustments by Major Program

# FY 2015 Supplemental Operating Budget

## DEPARTMENT OF COMMERCE AND CONSUMER AFFAIRS MAJOR FUNCTIONS

- Develops standards relating to the licensing of and general supervision over the conduct of the financial services industry, professions, businesses, trades, and insurance companies.
- Grants or denies the issuance of professional, business and trade licenses; directs investigations, holds hearings, and suspends, revokes or reinstates licenses; makes, amends or repeals such rules and regulations deemed necessary to fully effectuate the provisions of the laws within the Department's scope and jurisdiction.
- Represents, protects, and advances the interest of consumers of utility services; conducts investigations; assists and cooperates with Federal, State, and local agencies to protect the consumer's interests in the public utilities fields.

- Coordinates consumer protection activities in the State; conducts investigations, research, and enforces laws, rules, and regulations in the area of consumer protection; provides consumer education services and programs.
- Administers the laws of the State relating to corporations; partnerships; sales of securities; registration of trademarks, tradenames, prints and labels; miscellaneous business registrations; financial services industry; the insurance industry; and provides advice on business formation.
- Ensures that cable subscribers are provided with services that meet acceptable standards of quality, dependability, and fair rates; maintains surveillance over filed rates, charges, terms, and conditions of services; and monitors the operations and management of cable television operators and public access television entities.

Program ID: CCA 102

Program Structure Level: 10 01 03 01

Program Title: Cable Television

#### A. Program Objective

To foster the development of responsive and reliable cable television communications services for the people of Hawaii, by promoting the public interest in authorizations by the State regarding cable television franchises; regulate basic cable television rates and service to ensure compliance with applicable State and Federal law; expand the Statewide Institutional Network; continue the availability of Public, Education and Government cable access; and to engage in activities promoting the expansion of, and accelerating, the deployment of broadband infrastructure.

#### B. Description of Request

- Add Staff Attorney position and trade off/transfer special funds to assist with telecom reform, broadband deployment, and cable regulation for the Cable Television.
- Add \$2,000,000 in trust funds for inter-departmental transfer to the Department of Labor and Industrial Relations (DLIR) for Capital Improvement Program Grant to Hawaii Public Television Foundation.

#### C. Reasons for Request

Given the increased complexity of responsibilities of the Cable Television Division including advocacy of broadband deployment and existing heavy regulatory proceedings, the workload of the Cable Television Division has increased significantly. The nature of the workload, which is more

complex, highly technical, and greater in volume, involves the existing, sole attorney in nearly every interaction of the Cable Television Division. Accordingly, the sole attorney's capacity is insufficient to meet the increased activities and has significantly impacted timely completion of critical tasks.

Having a second attorney to help more quickly and efficiently complete the Division's work can help in a number of ways. First, a second attorney would help to balance the workload and also serve the important function of providing coverage and back-up where if one attorney is otherwise unavailable, the other attorney can allow the work in the proceeding to continue without interruption or significant delay. Otherwise, the Cable Television Division is left in a tenuous situation without some additional assistance and may be unable to timely respond to action items that require legal analysis or review. With the workload that the Cable Television Division has at present, the addition of a second attorney will obviate the need to rely on only a sole attorney for all of the proceedings in which the Cable Television Division participates. Second. the speed and efficiency of which the Cable Television Division could operate would be greatly increased by adding a second staff attorney position. This request proposes to trade-off other current expenses (consulting contracts) to fund the attorney position.

Program ID: CCA 102

Program Structure Level: 10 01 03 01 Program Title: Cable Television

Act 134, SLH 2013, provided a \$2M CIP appropriation for a Hawaii Public Television Foundation Grant-In-Aid project (plans, design and construction of a new building for PBS Hawaii). The expending agency is the DLIR, with the funding to be provided by the Department of Commerce and Consumer Affairs from monies collected from cable subscribers which are being held by Oceanic Time Warner Cable, LLC. This request is to provide Cable Television Division with the appropriation for the transfer of funds to DLIR.

#### D. Significant Changes to Measures of Effectiveness and Program Size

In addition to providing added capacity, the Cable Division would also be able to reduce the number of hours and amounts billed by outside legal consultants as a result of hiring and training an attorney for the Cable Television Division. Developing expertise in-house would also allow for a greater degree of continuity internally within the Cable Television Division.

Program Title: Consumer Advocate for Communication, Utilities & Transportation Services

#### A. Program Objective

Through advocacy, education, and long range planning, to ensure sustainable, reliable, safe, and quality communications, utility and transportation services at a fair cost for Hawaii's consumers for the short and long term.

#### B. <u>Description of Request</u>

- Add \$700,000 in special funds for other current expenses for consultant services.
- 2. Add attorney position and \$49,714 in special funds to support Clean Energy Initiatives

#### C. Reasons for Request

1. New initiatives, including an interisland power cable and the importation of liquefied natural gas (LNG), are novel and complex requiring consulting expertise. New dockets are being opened to investigate renewable energy initiatives, which also require consulting expertise. With the pre-existing workload not decreasing, the existing resources cannot accommodate the new initiatives as well as the pre-existing workload. In many of the past dockets dealing with renewable energy, the primary arguments have been policy based and do not involve sufficient analytical evidence to help support positions consistent with the public interest and State policy. While the utility companies often offer analysis and reports for consideration

in these proceedings, there is a general distrust of the utilities and the consultant work that the utilities provide; additional analysis from other sources would either help refute or corroborate the analysis provided by the utilities.

Because the consultant contracts for these analyses can be significant, the Consumer Advocate has not been able to get consultants for each proceeding. The lack of reliable, independent analysis has contributed to the delays that are being experienced in these proceedings involving key issues affecting renewable energy initiatives. The necessary expertise for many of the new and complex issues is not expected from new hires or even incumbents.

Increasing the consultant budget will allow the Consumer Advocate to present analyses that will hopefully expedite and facilitate actions that need to be taken to further greater renewable energy integration, an interisland power cable, LNG, biofuels, and other Initiatives. It will also help the Consumer Advocate be more proactive on some of these issues by allowing more interim (i.e., analysis outside of docketed proceedings) analyses to be conducted so that proceedings do not get delayed while waiting for analyses to be conducted once the docket has been opened. Increasing the budget should facilitate the increase in percentage of alternative energy sources used by electric utility companies, which is one of the Consumer Advocate's measures of effectiveness.

Program ID: CCA 103

Program Structure Level: 10 01 03 02

Program Title: Consumer Advocate for Communication, Utilities & Transportation Services

2. Due to clean energy initiatives, the workload of the Consumer Advocate has increased in terms of both volume and complexity. This increase has a direct impact on the workload of the existing two attorneys for the Consumer Advocate. The initiatives to integrate more renewable energy are resulting in more power purchase agreements, interconnection agreements, and other associated contracts to review. Investigatory dockets that are covering new issues and areas require more research and preparation by staff and attorneys. These new initiatives are also raising significant issues that are attracting more interested stakeholders resulting in increased workload in terms of various motions and filings by the existing attorneys. These initiatives that are in accordance with New Day Initiatives include the investigation of an interisland cable, that will span a significant number of issues that will require significant amounts of work and coordination, including, but not limited to, environmental regulations and laws, financing regulations and laws. new regulations governing cable utility franchises, and new contract issues.

Besides the new and complex work associated with renewable energy and energy efficiency initiatives, the Consumer Advocate also has to deal with new and evolving issues in other regulatory areas as well. For example, Gov. Abercrombie has set forth a goal to have gigabit broadband widely available in Hawaii. This initiative is affecting the manner in which telecommunications applications and transactions are reviewed. In addition, determining how utility infrastructure design and access to utility infrastructure can facilitate the expansion of broadband facilities require research into State and county laws and

ordinances as well as industry standards. Besides telecommunications, there are also changing laws and regulations related to air emissions that require research and analysis of those new laws and regulations and how they affect current electricity resources as well as how they might influence future resources. There are also changing laws and regulations related to water quality that affect the electric utilities (e.g., when they use water for their cooling facilities and when they have water outfall), water utility companies, and wastewater utility companies.

Due to the increasing workload and complexity, the attorneys' workload has increased. It is common practice in private and public practice to have at least two attorneys assigned to a case. This helps to balance the workload but also serves the important function of providing coverage and back-up where if one attorney is otherwise unavailable, the other attorney can allow the work in the proceeding to proceed without interruption or significant delay. With the workload that the Consumer Advocate has, the addition of a third attorney will obviate the need to rely on only two attorneys for all of the proceedings in which the Consumer Advocate participates. A third attorney will allow the Consumer Advocate to conduct its analysis and prosecute its cases more expeditiously and mitigate delays and/or the need to not participate in proceedings.

Program ID: CCA 103

Program Structure Level: 10 01 03 02

Program Title: Consumer Advocate for Communication, Utilities & Transportation Services

#### D. Significant Changes to Measures of Effectiveness and Program Size

While the current level of integrated renewable energy (28%) is meeting the statutory mandate for 2015 (15%), the measurement standard will change by statute, which will result in a decrease. Under the new method, the achieved level would only be about 14%. It is uncertain that Hawaii's energy grids will be able to accept sufficient new sources, both from utility scale and distributed generation, to continue the progress to date. If additional consultant monies are available, the Division will target analyzing potential measures that can be taken to increase the energy grids' abilities to take on more renewable energy as well as to address the increasing amount of novel and complex issues that are being raised in various renewable energy and broadband initiative proceedings.

Program Structure Level: 10 01 03 03

Program Title: Financial Services Regulation

#### A. Program Objective

To ensure the safety and soundness of State-chartered and State-licensed financial institutions, and ensure regulatory compliance by State-licensed financial institutions, escrow depositories, money transmitters, mortgage servicers, mortgage loan originators and mortgage loan originator companies, by fairly administering applicable statutes and rules, in order to protect the rights and funds of depositors, borrowers, consumers, and other members of the public.

#### B. Description of Request

Add \$110,000 in trust funds for the Mortgage Loan Recovery Fund for other current expenses.

#### C. Reasons for Request

Purpose of this request is to increase the appropriation for the Mortgage Loan Recovery Fund (Fund) established by Chapter 454F, HRS, in order to pay claims against the Fund and to pay any expenses related to the administration of the Fund. Although no expenditures for claims or expenses have been made since the Fund was established in 2010, the Division of Financial Institutions (DFI) is currently aware of potential claims against two licensees that could require the payment of the maximum \$100,000 per licensee. Under the current appropriation ceiling, claimants would have to be paid over two years. This would not be desirable for claimants who have already suffered losses.

#### D. Significant Changes to Measures of Effectiveness and Program Size

The Division has had a large increase in its workload as evidenced by the actual number of institutions and offices regulated, and the number of applications, inquiries and license renewals received, which were all greater than previously projected. The increase in program size is not only due to two new regulatory programs for mortgage servicers and mortgage loan originators and mortgage loan originator companies, but also due to changes in the other financial services industries regulated.

Further, the program size data do not reflect the increasing complexity of issues the Division must deal with as those industries reacted and adjusted to:

 Economic uncertainties as the nation and Hawaii begin recovering from the national mortgage crisis that began in 2007 and evolved into a full-scale financial crisis that resulted in unprecedented economic disruptions, both nationally and globally. However, the recovery has been very slow, major uncertainties still remain, and the economy is fragile.

Program ID: CCA 104

Program Structure Level: 10 01 03 03

Program Title: Financial Services Regulation

- Passage of the Dodd-Frank Act in 2010, considered the most sweeping change to financial regulation in the U.S. since the Great Depression, and the over 200 rules federal agencies must adopt to implement the Dodd-Frank Act. The law and implementing rules affect almost every aspect of the U.S. financial services industry, including consumer protection; systemic risks; large, complex institutions; liquidation procedures for systemically significant institutions; executive compensation; corporate governance; mortgage practices; and the structure and powers of the federal financial regulatory agencies.
- Increased supervisory oversight is mandated by new federal laws and expected by consumers. The increased supervisory oversight brings increased costs and expenses for both DFI (and the five industries it supervises) to validate compliance with the new federal laws.
- An evolving and increasingly competitive financial services industry that continues to undergo dramatic and stunning changes to its operations, structure, and risk profile due to factors such as increased competition from non-banking entities; new products and delivery channels, and complex technological innovations to offer and promote various financial products. DFI must keep abreast of the emerging issues and technological advances in order to not fall behind the industry's advances and to protect consumers.

All of these changes require more comprehensive and enhanced examinations and supervisory efforts that are not reflected in program size data.

Program Title: Professional and Vocational Licensing

#### A. Program Objective

To ensure that the individual is provided with professional, vocational, and personal services meeting acceptable standards of quality, equity and dependability by establishing and enforcing appropriate service standards; to regulate activities for the protection, welfare and safety of the participants as well as the public.

#### B. Description of Request

Convert 2.00 special fund Administrative Assistant positions from temporary to permanent status.

#### C. Reasons for Request

The positions are essential to ensure the continued efficiency and timeliness of the operations of the program. Converting these positions to permanent status is needed to perform duties that are of a permanent nature and essential to the operations of the program, and to be able to attract and retain qualified personnel.

#### D. Significant Changes to Measures of Effectiveness and Program Size

None.

Program Title: Insurance Regulatory Services

#### A. Program Objective

To ensure that consumers are provided with insurance services meeting acceptable standards of quality, equity, and dependability at fair rates by establishing and enforcing appropriate service standards and fairly administering the Insurance Code.

#### B. Description of Request

- 1. Add 6.00 positions and \$481,124 in special funds for regulatory oversight related to the Patient Protection and Affordable Care Act for the Insurance Regulatory Division (IRD).
- Add 1.00 position and trade off/transfer special funds for the IRD Captive Insurance Branch.

#### C. Reasons for Request

1. In 2010, Congress enacted the Patient Protection and Affordable Care Act (PPACA) which greatly enlarged the laws and regulations governing health insurance by many thousands of pages. This added complexity increases both the compliance work that health insurers must perform and the regulatory oversight that must be performed by the Insurance Division. PPACA also has initiatives to increase competition in the market, such as health insurance exchanges and the enabling of multistate insurers. This further increases the regulatory burden for the Insurance Division.

It is essential that the Insurance Division maintain adequate staffing levels commensurate with the growth in the regulatory environment. Delay in creating additional positions will result in longer processing times for qualification of health plans, rate evaluations and approvals, licensing, examinations and other regulatory activities that are essential in order for the Insurance Division to continue its timely servicing, regulation and development of the health insurance industry. The positions requested have already been established and have been funded with federal moneys made available under PPACA.

- 2. The Captive Insurance Branch (CIB) is requesting one additional Captive Insurance Examiner I position to supplement the existing roster of Captive Insurance Examiners. The position will be responsible to assist with the non-technical, administrative functions on captive insurance examinations. This will allow the senior examiners to focus on the technical aspects of examinations and have more time to perform examinations, potentially increasing Hawaii's market share and stature in this ever-increasing competitive industry. This request for an additional Captive Insurance Examiner I position will not increase the CIB's current budget ceiling. Captive Branch will fund this requested position by converting special funds from other current expenses to the personal services cost elements.
- D. Significant Changes to Measures of Effectiveness and Program Size

None.

Program Title: Post-Secondary Education Authorization

#### A. Program Objective

To implement the state authorization requirements under Title IV of the Higher Education Act of 1965, as amended, including the issuance of state authorizations to qualified accredited institutions and addressing complaints against authorized institutions in a manner provided for in applicable law.

#### B. Description of Request

- 1. Add 2.00 positions (1.00 filled and 1.00 new) and \$95,045 in general funds for the Hawaii Post-secondary Education Authorization Program established by Act 180, SLH 2013.
- Add \$116,132 in special funds for other current expenses for the Hawaii Post-secondary Education Authorization Program established by Act 180, SLH 2013.

#### C. Reasons for Request

The Department of Commerce and Consumer Affairs established the Post-Secondary Education Authorization program pursuant to Act 180, SLH 2013. The program was appropriated \$400,000 of general revenues for program start-up costs in FY 14. This request seeks an appropriation for the continuation of the program and to establish it as a stand-alone program to be staffed by a Program Administrator and Program Specialist. As the program will not be self-sustaining based on the projected revenues, this request seeks general funds of \$95,045 in FY 15 (\$118 K in out-years) to cover Personal Service costs for the program; 50% funding for the Program

Specialist in the first year and 100% funding for the filled Program Administrator's position. The program is also seeking special fund ceiling of \$116,132 in FY 15 (\$100 K in out-years) for other current expenses.

D. Significant Changes to Measures of Effectiveness and Program Size

None.

Program ID: CCA-191

Program Structure Level: 10 01 05 Program Title: General Support

#### A. Program Objective

To uphold fairness and public confidence in the marketplace, promote sound consumer practices by increasing knowledge and opportunity for our businesses and citizens.

#### B. Description of Request

Add \$175,000 in special funds for Information Systems & Communications Office to update email system to the cloud- based architecture and replace hardware.

#### C. Reasons for Request

The purpose of the amended ceiling request is to provide funds to cover the cost of migrating the department's email system from a server based environment, to a cloud based environment, and switching from Lotus Notes to a Microsoft solution.

This request is directly related to the transformation of State Government to an efficient and effective enterprise. It will fund Office of Information Management and Technology (OIMT) mandates to standardize systems throughout all departments and agencies. Specifically, these funds will be used to migrate the email system from a server-based Lotus Notes platform to a Microsoft cloud-based system. In addition, the Department of Commerce and Consumer Affairs (DCCA) will be deploying the full Microsoft software package as specified by OIMT. This software package includes Office Pro, SharePoint, Lync, along with the email clients, and is cloud-based. This

software package forms the basis to integrate services that OIMT will be implementing such as a unified communications and collaboration system.

The request also funds the replacement of the Storage Area Network switches which will be End of Life and not supported after February 2014. These switches provide DCCA's servers with all the hard drive and storage space they require.

D. <u>Significant Changes to Measures of Effectiveness and Program Size</u>
 None.
