

General Information

In the 1990s, NAUPA approved a standard set of codes in a uniform format to make electronic reporting more uniform. Improvements were adopted at the NAUPA annual meeting in St. Louis, Missouri in July 2002 and became effective for the Fall 2003 reporting period. The format was further revised by the membership on December 8, 2010 to add codes for new types of property have been developed and/or enhanced since the original format was adopted, related to individual retirement accounts, health savings accounts and educational savings accounts. New Relationship and Ownership Codes with accompanying definitions were added and became effective on September 26, 2013.

Reporting Media

Holders may send their holder reports using any of the following media:

- 1.44M Floppy Diskette (**only where approved** - contact the reporting state prior to sending for details.)
- CD-ROM
- Email Attachment (**only where approved** - contact the reporting state prior to sending for details.)
- FTP (**only where approved** - contact the reporting state prior to sending for details.)
- Tape (**only where approved** - contact the reporting state prior to sending for details.)

Standards

Holders need to conform to the following standards:

- Diskettes must be IBM PC/AT compatible 1.44MB 3 1/2" floppy disks.
- The file must be in non-delimited ASCII format with no imbedded control characters or hexadecimal values, etc.
- Each record will be separated by a Carriage-Return and Line-Feed (CR/LF).
- All numeric fields (type code N) must be right-justified, zero filled, with decimal points assumed. No decimal points are actually entered.
- All character fields (type code C) must be left-justified, space filled.
- The file will be the only file on the diskette and will be in the root directory. (See section on multiple holder reports for reporting more than one holder on a single diskette.)
- All diskettes must include an external label with the preparer's name and telephone number. Paper printouts of the file may be sent to assist the information-processing staff in correcting minor errors, but are not required.

Contact your specific reporting state for more information about reporting standards.

Record Type Descriptions

The NAUPA standard for reporting unclaimed property is based upon seven record types:

- (1) Holder Records
- (2) Property Records
- (3) Property Additional Owners
- (4) Reserved**
- (5) Securities Additional Information
- (6) Tangible Property Information
- (7) Reserved**
- (8) Reserved**
- (9) Summary Information

The records are based upon a 625-byte record layout developed by NAUPA. The first byte of each record contains a TR-CODE that denotes the type of record, and the subsequent 624 bytes are used to store the fields for that particular record. The TR-CODE will be a number between 1 and 9. This number will indicate the type of record as indicated below:

If the TR-CODE equals:

- **1** - then it is a **HOLDER** record.
- **2** - then it is a **PROPERTY** record.
- **3** - then it is a **PROPADD** record.
- **5** - then it is a **SECURITY** record.
- **6** - then it is a **TANGIBLE** record.
- **9** - then it is a **SUMINFO** record.

TR-CODES **4**, **7**, and **8** are reserved for future use.

Holders using the NAUPA standard must use the file layouts as shown. The fields are comprehensive in nature, meaning some fields are not used by all states and some fields may only be used by one state.

Each state will load the fields that it needs in their respective states. In the **Mandatory - Required - Optional** column of each record type layout, it will state if the field is mandatory, required, or optional.

If the field is marked:

- **"mandatory" or "M"**, information must be supplied in order to process the file correctly or the file will be rejected.
- **"required" or "R"**, you must supply the information if you know it, i.e., the information is usually required by law or regulation.
- **"optional" or "O"**, the information is desired and will be used if supplied.

Multiple Holder Records

Since the PROPERTY, PROPADD, SECURITIES, TANGIBLE and SUMINFO do not contain fields to link them with a certain holder record, using a single file for multiple Holder Reports requires some special handling. If multiple Holder Reports are put on a single medium, Holders MUST follow the instructions below:

Multiple Holder Reports may be included in a single diskette using one of the following options:

Option 1 - Each Holder Report is located in a separate file in the root directory. The file begins with a HOLDER record, and ends with a SUMINFO record. Only one HOLDER and one SUMINFO record exists in the file.

Option 2 - All Holder Reports are in the same file in the root directory. The HOLDER record must be the first record in the file, and the SUMINFO record must be the last record in each Holder Report. All PROPERTY, PROPADD, SECURITY and TANGIBLE records located between the HOLDER and SUMINFO records will be assumed to belong to that HOLDER record. The HOLDER record for the second Holder Report should be the first record after the SUMINFO record for the previous Holder Report. The same criteria will hold true for subsequent Holder Reports.

Field Definitions / Specifications

The following records are defined and specified by NAUPA:

- [HOLDER Record](#)
- [PROPERTY Record](#)
- [PROPADD Record](#)
- [SECURITIES Record](#)
- [TANGIBLE Record](#)
- [SUMINFO Record](#)

HOLDER Record

There will always be at least one HOLDER record with each report. The information in the HOLDER record relates to the institution reporting the property. All subsequent PROPERTY, PROPADD, SECURITY, TANGIBLE and the SUMINFO records are attributed to this holder's report.

Relationship Codes		
HE	Heir	Anyone who receives property of a deceased person either by will or under the laws of descent and distribution. (Explanation: a devisee under a will is also an "heir", even though unrelated to the decedent.)
IN	Insured	The person or entity who will be compensated for loss by an insurer under the terms of a contract called an insurance policy.
JT	Joint Tenants	An account held in joint tenancy presumes a right of survivorship, but this presumption can be overcome by evidence that the account was really the property of only one, and the joint tenancy was for convenience. Right of Survivorship is not specifically stated.
JS	Joint Tenants with Rights of Survivorship	A type of account which is owned by at least two people, where all tenants have an equal right to the account's assets and are afforded survivorship rights in the event of the death of another account holder. In this type of account, a surviving member will inherit the total value of the other member's share of account assets upon the death of that other member. All members of the account are afforded the power to conduct investment transactions within the account as well.
TC	Tenants in Common	A type of account which is owned by at least two people with no rights of survivorship afforded to any of the account holders. In this type of account, a surviving tenant of the account does not necessarily acquire the rights (and account assets) of the deceased person. Rather, each tenant in the account can stipulate in a written will how his/her assets will be distributed upon his/her death. Generally, the member ownership in the account is determined on a pro rata basis, meaning that if there are two tenants in the account, each will have a 50% claim on the account's value.
JE	Tenants in Entireties	Joint ownership of property or securities by a husband and wife where, upon the death of one, the property goes to the survivor.
OR	(Or) Unspecified Joint Relationship	Unspecified joint relationship including 'OR'

PA	Payee	The one named on a check or promissory note to receive payment.
PO	Power of Attorney	A written document signed by a person giving another person the power to act for the signer in designated circumstances and with respect to designated property. Explanation: There are both general powers of attorney which give the authorized party broad discretion and special powers of attorney that are limited in scope.
RE	Remitter	Used primarily on official checks. The Remitter is the person who purchased the official check. This relationship is separate from the Holder who turns the property over to the state.
SO	Sole Owner	Sole Owner is used when there is only a single owner for the property, and that person has all rights to the ownership of the property.
TE	Trustee	A person or entity who holds the assets (corpus) of a trustee for the benefit of the beneficiaries and manages the trust and its assets under the terms of the trust stated in the Declaration of Trust which created it.
UG	Uniform Gifts to Minor	Property that is gifted to a Minor under the Uniform Gifts to Minors Act – (UGMA). This act allows minors to own property such as securities. Under the UGMA, the ownership of the funds works like it does with any other trust except that the donor must appoint a custodian (the trustee) to look after the account. Regardless of whether the minor has reached the age of majority, they should be coded with the UG relation. The custodian on the account should be coded as CU.
UT	Uniform Transfer to Minor	Property that is gifted to a minor under the Uniform Transfer to Minors Act – (UTMA). This act allows a minor to receive gifts such as money, patents, royalties, real estate and fine art, without the aid of a guardian or trustee. The gift giver or an appointed custodian manages the minor's account until the minor is of age (usually 18 or 21).
UN	Unknown	The owner's relationship to the property is not known.
UF	Usufruct	Usufruct is a real right in a property owned by another, normally for a limited time or until death. Simply stated, it is the right to use the property, to enjoy the fruits and income of the property, to rent the property out and to collect the rents, all to the exclusion of the underlying real or naked owner. The usufructuary has the full right to use the property but cannot dispose of the property nor can it be destroyed.
